Emilio Sala Sala, David Ramos and the rest of the press release have confirmed that Jesús Aranguren, the new CEO of Adif, is going to run a very similar scheme to the one that was used to save electricity, which is to close the power plants one by one. With the help of this data Adif will be able to take the necessary decisions. Jesús Aranguren Aranguren, the new CEO of Adif Speaking of the new CEO of Adif, Jesús Aranguren, the spokesperson of the company said that his priorities will be to keep the company at the highest level, innovate in order to improve the competitiveness of the industry and identify areas where the company can improve, especially in electricity generation, the most used electricity generation source. The first point of focus is to keep Adif at the highest level. The company is trying to improve its processes, make sure that everything is carried out in the best way possible and maintain its world-leading performance. It is also going to be a priority for Adif to get involved in the industry, especially in the matter of ensuring that the important transformation of the energy system carried out by the country continues in the right way. Moreover, the company is going to concentrate on finding ways to improve in key areas like electricity generation, focusing on the rationalisation of the grid and on the service to consumers. It is also going to focus on the business development of the group. The company will keep innovating, especially in the electricity generation sector. Adif has been developing a very strong and competitive position in the power sector, as well as being a player in the electricity trading and transport sectors. The focus is going to be on electrifying the transport sector and this is also a strong point of the company, so that it can support the necessary transformation of the country's transport system, reducing the number of cars and promoting alternatives. Adif is going to maintain its strong relationship with electricity consumers and it is going to continue its policy of involving
