These include the Drafting and Modelling Tools, the Properties palette, and the Measurement palette. 4. What are the types of layers in AutoCAD? Can you describe each one? A Layer is an abstract grouping of objects that have been placed in the same two-dimensional space in the drawing. Layers contain a symbol set of the same type, which defines the object. Symbols are organized into layers, depending on the type of the objects. Layers are the base for each of the drawing views. 5. Explain the purpose of linetypes? Police said the man was working at a business on South Bedford Road when the two teenagers approached him and asked if they could take a ride. When he said no, they tried to take the bicycle from him. Police said the man had a handgun in his pocket, and when the teenagers tried to take the bicycle, he pulled out the gun and fired one shot. The teens fled the scene. One was caught a few hours later, and the other is still being sought. Police said this is the first incident of a gun being fired in Bedford in more than five years.(CNN) -- As the largest city in his country, the capital of Nigeria is a glaring symbol of Nigeria's sorry state of poverty and the inequality that makes it all too easy to live in luxury while others die in the street. Even for the children of President Goodluck Jonathan's home state of Delta, there is not enough to eat or enough access to clean water. The capital is a sprawling sea of what looks like thousands of beehive huts or clusters of mud buildings in a swampy, fetid environment. Only in the occasional traffic jam or crowded market do you see green fields and trees. Now the city is in ferment with the onset of national elections in March and, as usual, the future of the country is at stake. While the opposition says it will be the chief opposition to the ruling All Progressives Congress (APC) party if it fails to hand power to a people-friendly successor in March, the national elections will be a step toward democracy. The last presidential election in 2003 was contested by two candidates: Umaru Yar'Adua, who died of complications from an earlier stroke, and then-vice president, and Jonathan's main challenger
