elm config elf.elf: line: [1, "dynamic_memory"] I have searched the web for an answer to this problem but have had no luck. What should I do to fix this issue. Many thanks. Update: I noticed that when I click on the elm config.elf file it says it can't be found because it doesn't exist. But when I enter it into Eclipse it works. That's why I can't figure out what's going on here. Can someone explain to me how it works Run eclipse -> eclipse
