Q: Advantages of using Hadoop I have searched the web to find what the advantages of Hadoop is, but it was too much different. Can anyone briefly explain what the advantages of Hadoop is? A: The advantage of Hadoop is that it is an open-source project. This means that the source code and community is available for anyone to work on or modify. That of course comes with a variety of drawbacks: It is a large project with a fairly large maintenance burden It has a large learning curve It can be slow It also has many advantages: It can be hosted in-house It can be shared between teams It is simple to setup It has many tools integrated with it (i.e. Pig, Hive, etc.) The other advantage is that it is platform-agnostic. This means that Hadoop has little to no dependencies on a particular operating system. You can run it on any operating system you wish. I.e. it does not require a Linux environment. It will run on a bare-bones OS. Another advantage is that if you do not require distributed computing then Hadoop is a great way to scale your own application. September 2015 Surprise at the DMV Alex/Photo by Shana and Bethan We've seen the billboards and the TV spots, but how much do you really know about your state's registration deadline for the new model year? Check this out: California is the first to release its new rules for 2016 on their secretary of state's website. California's deadline is 3:00 p.m. Pacific Time on October 5. If you think, you'll qualify for an exemption from the lower number, remember that the number you'll use is the monthly number. So 1,001 for September is based on monthly use. The higher number is for a full year. The info sheet isn't complete, but it does give some of the rules. – Renewal must be received in California by the stated deadline; or– Renewal in another state will be accepted within 30 days after an application is submitted in California. OR– Renewal is not required if a license expires by its stated expiration date and is not renewed. – All completed California renewals are valid for

Q: How to monitor PSEXEC for errors I have an Access VBA.accdb that I want to open and see what it's doing on my computer while it's executing. Is there a way to do this? Basically I want to be able to see the code that's being executed without necessarily having to run it myself. I'm using Win 7 Pro x64. A: You will need to change the permissions of your accdb.exe so that you can debug it. Something to the effect of, "chmod u+s C:\path\to\the.exe" Then you can run it using "runas /user:Administrator /password:password /savecred /exec C:\path\to\the.exe" If there are errors, you should see an error from the elevated application that is running. RASHER HOPES: Mets slugger David Wright's move to first will benefit Mets fan bases. The months of speculation are over. The day of reckoning arrives. Despite the obvious potential pitfalls, it is time for the baseball world to wait anxiously for David Wright's new position and wonder about his surgically repaired back. "It's nice to know he's getting ready to come home," said Mets fan Jason Delaney, 33, who watched the Wright news on the radio on the way to his morning jog last week. "I hope he's coming back and doing what he should. He's one of the best hitters in the game." As the ball hits the ball and the batter begins his approach to the plate, the last few steps give insight into what's about to occur. Quick feet and anticipating movement. Wright's step will be nearly six inches faster and for a first baseman that means a spring in his step and a fluid swing. For the Wright move to a first base that's more than three feet shorter than shortstop, it would seem as though the Mets are making plans in case their first baseman does not return. Wright, who is in his 15th season and is a five-time All-Star, is coming off micro-discectomy surgery that occurred before the All-Star Game in Atlanta and it's been that long since Wright has played. Wright's playing time, which was in constant decline last year, is expected to increase because of his back and pitching rotation by the struggling Mets is a big
