WhoCrashed Home Edition Overview: WhoCrashed Home Edition is a simple and easy to use software utility whose main function is to help you discover what are the possible problems of your computer that cause it to malfunction, randomly reboot or display warning dialogs. The application checks the computer, and more specifically, the installed drivers, as they are often to blame for many system crashes. In addition, WhoCrashed Home Edition analyzes the kernel modules. In the case of certain computer configurations, a kernel error will not always necessarily display the 'Blue Screen of Death', also know as the 'Stop Error' or the 'Bug Check Screen', but it will however cause them to reboot for no apparent reason. After pressing the 'Analyze' button, WhoCrashed Home Edition locates the crash dump directory, informs you whether the function is enabled or not, and analyzes the found items, estimating the possible causes. The application then offers detailed information about the conducted analysis, enumerates the likely culprits, such as a driver failure or bug, and advises you where to look in order to find
