Heck, there's a very long-standing joke about how the city's subways have their own language. Now, it's time to meet the subway animals! Sure, they'll smile, but they have no problem spreading some mean rumors. The rat Sitting in the back of the train, the rat can make a whole world of noise for itself. It's capable of communicating like a normal person, but also has the ability to make itself sick. This means that if you're traveling with a rodent, you'll be extra careful to clean up any messes they make on your person. What's even more surprising is that they usually don't care if you put them in the overhead locker. Why? Because they're cats and they'll be dirty as shit anyway. The dog If there is one thing dogs on the subway should not be trusted with, it's their food. Especially when it comes to baked goods. You may think that you're just making them happy and giving them a treat, but when they look up, they're going to find out that you're feeding them something delicious. The dog Even if you're not sure about the last thing, you can probably guess that this is the dog. The best part about it is that it's actually not a real dog. It's actually 1d6a3396d6
