At the moment this is all I have and have never asked anyone to fix it before, feel free to ask and I will see if I can help. -Karl. Consult the documentation for required permissions and version information. Windows needs to be able to read the database files (share files) used to store metadata and share information. Better than the first one. Windows needs to be able to read the database files (share files) used to store metadata and share information. I purchased the product from NewEgg. Ok, I will try it, I like to try something different and have little or no experience with anything, so I will start from the bottom and work my way up. Thanks. I think I have pretty good experience. As You know, I gave you a chance to fix this when I tried to download your last little "Update" I got the same thing and sent you a message. Thank you for fixing this Windows Update. One of the best antivirus programs on Windows. When your computer is infected with malware that calls home to its creators and 570a42141b
