A: In Python, the.extension function of a file does exactly what you want, so >>> foo.extension # Check the extension '.dat' >>> foo = open(foo, 'w') # Open a file with write >>> foo.write(foo.read()) # Write what is read into the file I'm not sure why you're trying to do this in a hacky loop though. And they shall beat their swords into ploughshares, and their spears into pruning hooks. Tuesday, September 18, 2007 Sarah Palin: Floppy Hat Hat News! Oh my goodness. The woman makes me sick. I hate everything about her and I'm not the only one. The Alaska secession movement is at an all time high. The governor's popularity just sunk to 31%. She's in the middle of an ethics scandal, where she lied to a newspaper reporter about being on a hunting trip with her husband and was caught at an alleged fundraiser wearing a "Flat Earther" T-shirt (an anti-creationism T-shirt). Oh yea and there's the thing about her lying about her positions on big issues. She's a staunch pro-life, supports a ban on partial birth abortion, against school integration, supports the school prayer amendment and wants to end the "National Endowment for the Arts" and generally hates homosexuals. But all of this is the least of her problems. Now someone has just thrown out the question of whether or not her daughter Bristol will be the future of American politics. When asked if her daughter would be running for the vice-presidency in 2016, Palin answered, "God willing." What the? Couldn't you even say "Yes?" Really? Isn't that more important? God's will? Who cares, right? I'm sure John McCain is saying that he has no worries about Sarah Palin's "God Willing" status in politics. After all, if God didn't want her to run, he would've sent a tsunami or something. She is a hard, hard right winger. My favorite part of her quote was her use of the term "creation science". How can you use that term to describe a person who believes that you shouldn't be able to have your beliefs mixed with the law? Science has no religious element, you can't use the Bible to explain biology. It's ridiculous. I 3e33713323
