Thymeleaf Validation:

Thymeleaf validator is not  
working I am using

Thymeleaf, Spring-Data JPA  
and Spring-Boot. I have one  
form, where I use Thymeleaf  
validation for the input form.  
The validation is working fine  
in the controller, but once the  
form is submitted, Thymeleaf  
validator fails. I have  
attached a small snippet

---

below, where once form is submitted, it should validate and, if validation fails, throw an error. But in case validation fails, the error page is displayed and form is not validated further. I want to validate each form field. The code is as follows: Model package

```
com.springboot.model;
import javax.validation.constraints.NotNull; import javax.validation.constraints.Size;
import javax.validation.constraints.Pattern; import javax.val
```

---

```
validation.constraints.Valid;  
import javax. ca3bfb1094
