Welcome to the Wild: World, one of the most beautiful places in the world. This game takes place in the Wild, it is not as wild as you might expect. Players must play in a living, breathing ecology, where every step, quest, and piece of equipment has consequences for the world around them. Wild will ask you to complete missions, but also to play the Wild and test it's limits with exploration and combat. The desire to test the wild is intrinsic to the wild's appeal. What is the Wild? The Wild is a Real Time Strategy Experience. Three factions called "Pawns" have risen up against each other and a new world order takes shape. The Pawns are fighting to make their way in a world where earthquakes and other natural disasters make progress impossible. You must plan your actions and build your own empire in this world. All the while, you must keep an eye out for the dark elf called the Red Knight who has set his sights on you and your friends. The Army of Nature By being the opposite of its name, The Army of Nature is the army of nature as opposed to the nature of the Army of Nature. Each piece of equipment in the Army of Nature has a specific purpose. Some help your units, others hinder them, some make the game easier, others make it harder. The Army of Nature has a greater variety of animals and units than any other faction and can field up to 90 units at a time. That means you'll have to think twice before unleashing your units and think twice about what you tell them. The Army of Nature uses a focus stat like every faction in the game, they all increase attack, defense and HP. The Nature the Army of Nature uses is elemental, using the strength of the elements to create creatures, weapons and armor. The Paladin is a Wyverns a gnarled fist made of elemental earth and its tail made of the strength of fire, the Dragonhawk is an intimidating beast made of rock, the war python is a giant monster created with the minds of the elemental earth, water and air, and the atomic swallow is a creature made of strong atomic power. Universe Take place in a living, breathing ecology, where every step, quest, and piece of equipment has consequences for the world around them. - See the Wild as more than just a map - See the Wild as a living, vibrant, world, complete with day and night cycles. - Talk with other
