Based on a license from “Game of Thrones”, the global smash hit fantasy novels by “George RR Martin”, the game is the next fantasy RPG project from the creators of the franchise world, “RuneScape”. ABOUT ELDEN RING The world of the Elden Ring is an updated version of the Unova region from the author of “Pokémon”, “Hiro Mashima”. The ancient civilization spread to the entire world in the Unova region, but after that civilization vanished from the world, it held an influence on the modern world. As a result, the land where the world is spread, which is full of a diversity of time periods and space, is called the “Lands Between”. The Lands Between evolved from the remnants of the ancient civilization. There are so many places there that reflect a time span of thousands of years. There are places with a modern culture and architecture, places where you can hear the echoes of history and old stories, and incredible ancient ruins that have been buried for ages. And in the midst of all this, in the Lands Between, there is the Elden Ring. As with the Unova region, the Unova continent, and all the other places in the world, the Elden Ring has an unparalleled and unstoppable power that has become the stuff of legends. The Elden Ring is named after a power from the ancient civilization, which was passed down through

---

countless generations and became an influence on the world that exists in the modern world. With the power to create life, the Elden Ring is believed to have created the entire human race. With the power of power over nature, it is considered to have consumed the power of destruction that exists in all living things, thereby maintaining the balance in the world. And with the power of death, it is believed to have covered the entire world with the mists of death and brought life to an end. As the power of the Elden Ring has not been used for thousands of years, no one knows the current state of this power. However, the power that has not been used for thousands of years is now awakening. This power has finally been opened and cannot return to the world, as it is forbidden from destroying everything again. And the gods who have been awakened and came back to life have told the world that a man named Tarnished is the one who embodies this power

## **What's new:**

**Phantom Thief is a stealth, 3D rogue-like game in which players take the role of a thief seeking to rob an E-Robbery bank. The goal of the game is to steal as many E-Bank Notes as possible using only the basic mechanic of sneaking through the bank, in order to bypass the security cameras, and get out of the bank as stealthily as possible to eliminate the stealing limit.**

**The Ghostly Maze is set in a world filled with no boundaries and no exception. The game offers two styles of play. The first is the “Top-Down View”, which provides a bird’s-eye view of the maze. Upon using the “Explore” button, you may view the space in the maze from all directions, including the ground and even the air. Furthermore, there is the “Up-Down View” which gives players to view their hand in a new angle.**

**This all-new Android game offers an over the top fantasy-adventure with classic RPG gameplay, making it an ideal choice for Android fans who like both action and role-playing games. A large RPG world with over 80 quests is waiting for you, and dozens of upgrades are waiting to be unlocked!**

**The following year, another competitor just came up the scene from Japan: a PlayStation Portable game named “Breath of Fire III”.**

**One day in 2012, Mr. Yoshida said upon receiving Kaze’s phone message, “Huh? A phone message?” and then gave a look of surprise. Kaze's phone rang once again, and her phone display read, “Hello?!”**

**Soon afterward, however, she received a text message, “‘Thanks! I am starting to sort out since today!’ He said ‘Get me a laptop, made sure not to go out at all until this business.”**

**“What are you doing?”**

**Kaze immediately answered “Yes, I understand!”**

---

**“Kaze confirmed his reply, and it read, “I’m sorry! I am asking for your help and relying on you to be my bodyguard**

New geological records in Patagonia, Southeast Asia, Madagascar and the Izu-Bonin-Mariana Arc in the Pacific Ocean provide us with a better understanding of the timing and sequence of plate-tectonic events on Earth's surface. By comparing these records with plate-tectonic models and geodynamic theory, scientists hope to better resolve the difficult task of resolving geodynamic boundary conditions. The Izu-Bonin-Mariana Arc (IBA) of the Pacific Ocean lies near the subduction zone, and is the most active volcanic region on Earth. By studying the geology and tectonics of the arc, scientists seek to understand the subduction process itself. New data from the Izu-Bonin-Mariana Arc Geology Project, an international

---

project to collect geologic and geophysical data on the arc, revealed that the tectonics of the subduction zone is complex and that the subducted slab is not a single rigid plate of rock and metal but rather a mixture of minerals and fluids. Prior to the IBA formation, a 500-mile thick section of oceanic crust known as the Laramide tectonic plate was subducted beneath the Farallon Plate. As the Farallon Plate subducted, its upper crust was intruded by granite intrusions and the back-arc portion of the Laramide was subducted, causing the IBA to be formed in less than 1 million years. The subduction and
