DoubleTree Hotels - Q: Proper way to create a socket for a process I am learning about threads and I want to be sure I understand the concept of how to properly use socket in windows. I want my socket to be able to listen for data from a specific process. I know I can use the listen function to listen for data from a specific port. my question is does it make sense to make the socket listen for a specific process. A: There isn't a whole lot of reason to read incoming connections to a specific process. If you'd like to learn more about sockets, you can check out: How to create a basic TCP socket program in C#

## DM Profile Builder 2 Plugin For Sketchup
