We cannot use such information to communicate with you without your consent. Your browsing activity on this website may be tracked by Google Analytics.In the field of micro- and nano-electronics as well as molecular and bio-nanotechnology, nanoparticles (NP) have gained increasing attention. One of the most significant challenges of developing scalable and versatile functional NP growth platforms is to achieve sufficient NP nucleation and growth of high quality and uniformity for large area and high throughput applications. Often poor nucleation and growth of NP in these platforms are the result of inadequate growth conditions and materials. Most of the current fabrication processes of nanostructures are incompatible with low temperature processing 6d1f23a050
